IQstock is a Microsoft Excel Add-in to assist with updating physical stocktake results back into SAP

KEY FEATURES

- Retrieves Physical Inventory Documents directly into Excel from SAP by Plant or Storage Location
- Allows users to directly update physical inventory count results back into SAP from within Excel
- Reports stocktake quantity and value variances within Excel for further investigation
- Enables recounts and updating of count results
- Enables batch and serial number entry
- Posts confirmed count results directly into SAP adjusting recorded inventory balances
- Supports flexible count sheet templates and column selection
- Requires absolutely no changes to your back-end SAP system, accessing only published SAP Business Application Programming Interfaces
- Is fully secure, using existing SAP login credentials
- Is suitable for both Inventory and Warehouse Management

BUSINESS BENEFITS

- Format customised Count Sheets from within Excel for distribution and printing incorporating standard Excel presentation capabilities
- Generate flexible count labels from Excel incorporating barcodes
- Efficiently capture actual count results directly into Excel by location, collate data outside of SAP and aggregate using standard Excel formulae
- Use generic Portable Data Terminals to support scanning solutions, using Excel as a low-cost SAP integration mechanism
- Reconcile inventory counts outside of SAP to validate the accuracy of the count results prior to processing updates
- Use Excel as a high performance and intuitive data entry mechanism
