

IQX Business Solutions

About IQX Business Solutions

IQX provides SAP customers with packaged business solutions and consulting services that deliver enhanced Business Insight, Collaboration and Productivity benefits by leveraging Microsoft Tools and Technologies.

We focus on improving the user experience across all core functional areas of SAP.

IQX solutions:

- Are business-ready for an engaging and intuitive user experience.
- Leverage your existing investments in SAP and Microsoft.
- Allow rapid "out of the box" installation for immediate value.
- Utilise Low Risk, Flexible, Future-proof technologies.

Today's business environment is too competitive for any organisation to operate in isolation.

IQX solutions allow users to assemble all the information, processes and functionality that they require to operate in a connected world. Leverage the power of SAP and the flexibility and familiarity of Microsoft in order to get more value out of your investments in both.

- Combine relevant SAP and non-SAP information sources to assess performance against the market.
- Provide visual performance indicators directly to every decision maker's desktop.
- Empower users to analyse real-time information with familiar tools such as Excel and Outlook.

- Design end-to-end workflow processes that flexibly incorporate SAP and non-SAP processes.
- Integrate SharePoint Document Management with SAP to allow both SAP and non-SAP users to contribute to and access core business documents.
- Allow seamless collaboration on structured (eg Orders) and unstructured (eg Supply Contract) business documents.

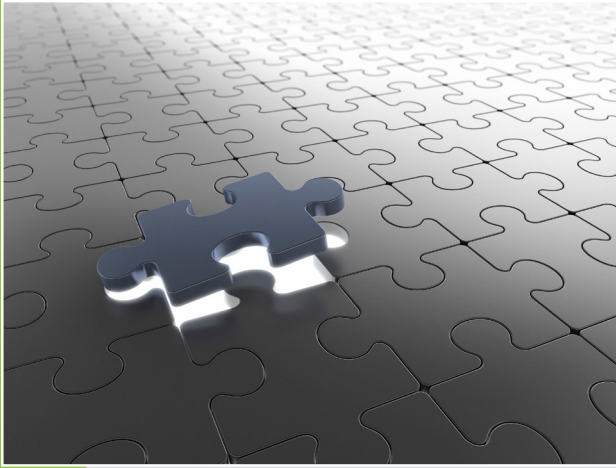

- Enable access to all in-house line of business applications and external services such as mapping, trading, and logistics service providers.
- Process SAP transactions via familiar Microsoft Office applications such as Excel and Outlook.
- Simplify and aggregate SAP transactions for ease of learning and speed of processing.
- Deploy functionality through intuitive workspace, at your desk or on the road.

IQX SharePoint Solutions include a suite of SAP connected web-parts that allow users to assemble their own “Intuitive Workspaces” combining SAP functionality with non-SAP, unstructured and external sources. In addition our portfolio of interactive InfoPath forms provide seamless access to a range of SAP transactions including data maintenance, transaction processing & self-service.

GL Wand extends Excel functionality into the SAP Financials suite offering a simple yet powerful real-time data reporting tool for Finance users. Interact with your SAP system using Excel functions for more timely and flexible business insights.

Sales Wand empowers end-users to analyse Order-to-Cash business performance using familiar Excel functionality. Eliminate data extracts and supplement your Excel-based management reporting processes with an intuitive sales reporting tool to deliver real time Revenue, Cost of Sales, Margin and Quantity KPI's across 14 standard SAP dimensions including individual products and customers if required

GLSU is a specialist Excel upload solution for SAP that delivers immediate benefit to finance users. Flexible and interactive Excel templates can be generated; data is pre-validated and loaded directly into SAP in a completely secure and intuitive process. Benefits include improved processing consistency, faster period-end closes and more detailed information granularity.

Budget Loader posts budget data into SAP directly from a spreadsheet with flexible templates. Import prior year planning and actual data for analysis. Utilise the full capabilities of Excel to build planning models combining historical and planning columns. Suitable for Profit Centres & Cost Centres, Activity Based Costing, Profitability Analysis, Internal Orders and Project Systems.

IQstock is a Microsoft Office Business Application to assist Inventory Managers with the process of updating physical inventory stocktake results back into SAP directly from Excel.

MyOVS HR Suite for SAP is a packaged HR self-service portal application combining the ease-of-use and flexibility of SharePoint Services from Microsoft® with the strength and control of SAP® ERP Human Capital Management software.

Express PO / PR enables purchase requisition and purchase order approvals at your finger tips. With seamless integration into SAP, purchase requisitions can be accessed via your browser or mobile phone for simple review and approval.

iNet.BI supports the presentation of live SAP ERP and BW data through SQL Server for immediate, flexible and extremely cost effective:

- Corporate Performance Management (CPM)
- Business Activity Management (BAM)
- Decision Support
- Business Process Insights
- Business Modelling, Planning & Budgeting

iNet.DM enables the use of SharePoint content management to provide a central point for users to upload and retrieve documents in distributed environments through the automated linkage and storage of incoming business documents (such as supplier invoices), internal unstructured content (eg Supply Contracts) and outgoing SAP Print Lists.

Custom Solutions: IQX provides specialised consulting services to organisations wanting to take advantage of SAP and Microsoft interoperability. With our experienced team of functional and technical experts we can deliver any style of project ranging from Microsoft Office add-ins and SharePoint proof-of-concepts to large scale enterprise solutions.

Business Process Management: We implement agile business process management solutions (including K2 and Nintex) that reference organisational accountabilities and business rules within SAP but extend far beyond the boundaries of SAP to ensure seamless end-to-end processes.

PARTNERS

As an experienced Microsoft ISV partner, IQX is addressing the needs of the SAP user community for more effective Microsoft/SAP interoperability solutions.

IQX has also partnered with industry leading software companies to provide you with the leading global solutions fully supported within Australia.

Through our established network of specialist consultancies, we are able to deliver turn-key solutions to all your accessibility, usability and collaboration needs.
